## Re.: Final Treated Cores from NC 903 and I-40

Duplin, Pender and New Hanover Counties, NC
Trimat Project \# 12-520
Mr. Durante,

As per your request Trimat Materials Testing, Inc. (Trimat) has revisited the roadways described above and have extracted asphatt cores for post treatment laboratory testing. These cores represent the treated sections of NC 903 and I-40. A total of 17 cores were taken for laboratory testing; 10 cores from I-40 for post treatment rejuvenation testing and seven cores from NC 903 for mixture evaluation testing.

## I-40 Core Results

The 10 post treatment cores were returned to our 1 ab, then the top $3 / 8$ inch saw cut and removed from each, then each set of two were combined for extracition and recovery testing. Extraction and recovery testing was performed as per ASTM D1856 and D5404, respectively. Once the asphalt binder was recovered, it was tested for viscosity as per AASHTO Test Method T315. The results along with the oriigindl prettreted results and percett improvement are presented in Table 1 below.

Table 1 - Core Results for Pre and Post Treatment

|  | Sample Number and Location |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 3374 | 3375 | 3376 | 3377 | 3378 |
| Test | MM 418 W | MM 418E | MM 411 In | MM 411 Out | MM 409 |
|  | Pre-Treatment |  |  |  |  |
| Complex Modulus, $60 \mathrm{C}, \mathrm{G} *(\mathrm{kPa}$ ) | 230.0 | 209.0 | 283.0 | 294.0 | 257.0 |
| Viscosity, 60C, (Pa-s) | 230000 | 209000 | 283000 | 294000 | 257000 |
| Phase Anglle, 60C (degrees) | 60.6 | 60.8 | 58.3 | 59.9 | 59.6 |
|  | Post-Treatment |  |  |  |  |
| Complex Modulus, $60 \mathrm{C}, \mathrm{G}$ * (kPa) | 227.0 | 125:0 | 160.0 | 174.0 | 162.0 |
| Viscosity, 60C, (Pa-s) | 227000 | 125000 | 160000 | 174000 | 162000 |
| Phase Angle, 60 C (degrees) | 57.6 | 57.5 | 59.7 | 58.1 | 58.6 |
| Percent Reduction | 1\% | 40\% | 43\% | 41\% | 37\% |
