

MPPPP

Partnering Through MPPP Creates Opportunities for:

- *Proactive Policies and Planning*
- *New Training Initiatives*
- *Needed Research*
- *Improving Materials*
- *Standardized Specifications*

Task Groups

Team 1 – Materials

Team 2 – Research

Team 3 – Training

Team 4 – Specifications

Team 5 – Policy

Team #1

~ Materials ~

Issue:

Are the best available local materials being used for pavement preservation?

Current focus areas:

Chip Seals

Winter Patching Materials

Team #2

~ Research ~

Issue:

What are the regional research priorities in pavement preservation?

Current focus areas:

**Preventive Maintenance Timing
Crack Sealing Reservoir Widths
Chip seals**

Team #3

~ Training ~

Issue:

How can training best assure quality workmanship for preservation treatments?

Current focus areas:

Coordinate a regional contractor training for certification program

Team #4

~ Specifications ~

Issue:

How can regional consistency be achieved for preservation specifications?

Current focus areas:

Develop general specifications that can be modified by the SHA

Share spec with local agencies

Create regional warranty performance standards

Team #5

~ Policy ~

Issue:

What can be done to advance pavement preservation in the region?

Current focus areas:

Gaining public awareness about the benefits of pavement preservation

Promote data integration and PMS network strategies
