

10th National Conference on Transportation Asset Management

April 28–30, 2014
Miami, Florida

www.trb.org/conferences/AssetManagement2014.aspx

Program Overview

The 10th National Transportation Asset Management Conference will cover topics on surface transportation modes of interest to agencies in all stages of asset management practice implementation. Themes will include comprehensive implementation within and across organizations, establishing and monitoring asset management plans, performance measures for asset management, tools and technology to assist decision making, transit state of good repair, and adaptation of transportation to extreme weather events and climate change. This meeting will serve as the forum for shifting into practice asset management initiatives from the Moving Ahead for Progress in the 21st Century Act (MAP-21) and as the venue for federal, state, local, and transit agencies; metropolitan planning organizations; and private-sector practitioners and university researchers to share knowledge, sponsor peer-to-peer learning, and work together.

Primary Objectives:

- To provide a forum to develop plans required to meet MAP-21 mandates and identify opportunities for these plans to improve existing agency practices.
- To offer a better understanding of the barriers to implementation at various levels in a single organization—as well as across organizations—and how to overcome them.
- To identify emerging practices in the use and implementation of performance measures for asset management, leading to effective adoption and deployment.
- To highlight emerging practices between states and owners of large transportation networks with respect to implemented and evolving technologies, methods, and tools.
- To help practitioners incorporate into decision making the impacts of extreme weather events and climate change on transportation infrastructure, while increasing the use of risk assessment and vulnerability analysis.
- To host a forum for transit professionals to expand on existing State of Good Repair Roundtable activities and to transfer knowledge among transit agencies on best practices in maintenance, procurement, and operations.

Call for Presentations

A formal call for presentations will be released in early June with responses due by July 31, 2013.

Conference Schedule

Preconference workshops are being planned for April 27–28, 2014. The conference will begin at 8:00 a.m. on Monday, April 28, and conclude at noon on Wednesday, April 30.

Planning Committee

Jason Bittner, University of South Florida, *Chair*
