Jack Witte, President and Owner of Corrective Asphalt Materials.

Received a B.S. in Civil Engineering from Missouri School of Science and Technology (Formerly UMR). I have been in the Asphalt Preservation industry for 18 years. My main background is in Engineering and Sales, which is an odd combination! I am married with three kids. In my spare time I enjoy duck hunting, fishing, family gatherings, organizing events with friends, spending time with my kids, and indulging in a few weekend cocktails at the Lake of the Ozarks!

I'm looking forward to working with other contractors to set up the Missouri Pavement Preservation Council for long term success!
