

PA Questions and Answers

What specific things are you doing to ensure social distancing in your shops and parts operations?

Currently we only have 1 or 2 mechanics per shop working due to only having limited crews performing essential functions. Guidance for entry of facilities attached. **“Note C. Every individual entering the building will undergo a screening which will include a scan of the individual’s body temperature using an infrared no-touch thermometer”** is limited due to thermometer unavailability.

Do you have any specific instructions for sanitizing vehicles?

See ***“Guidance for Cleaning Vehicles”*** and ***“Entering PennDOT Facilities”***

Any other relevant information or practices you are using to keep employees safe and prevent the spread of the virus specific to shops and parts operations environment?

We are preparing guidance to potentially bring back additional staff.
